EXPERIENCE

Software Engineer   Nov 2022 - Nov 2024
The Dot Studios   *Salem, TN*

- Developed and optimized software applications, reducing system downtime by 30+ hours per month through code improvements and performance tuning.
- Led a cross-functional team of 5 to successfully launch an e-commerce platform, overseeing full-cycle development.
- Designed and customized application interfaces, enhancing usability and aligning with client-specific requirements.
- Implemented ERP solutions using the Openbravo framework, improving workflow efficiency by 20% and streamlining client operations.
- Utilized Python, JavaScript, HTML, MySQL, SVN, GitHub, React, Django for full-stack development, integrating agile methodologies.

SKILLS

Programming Languages	Python, HTML, CSS, JavaScript, C,C++
Frameworks & Libraries	React, Vue & Node.js, Django, jQuery, Bootstrap
Database & Tools	MySQL, SVN, GitHub, Visual Studio
Software Development	Full-cycle development, API integration, debugging, optimization
Soft Skills	Communication, Time Management, Problem Solving& Critical Thinking

PROJECTS

Food Ordering Application

- Developed a responsive web app enabling users to search, order, and track deliveries in real-time.
- Integrated a React-based frontend with a Python-Django backend, reducing order processing time by 25

ERP System for HR & Finance

- Engineered an ERP platform to centralize HR and finance operations, reducing data redundancy by 30
- Optimized Django-based backend workflows to improve performance and data processing efficiency.

Event Management Application

- Developed an event planning and execution tool using Java Fullstack Development.
- Implemented real-time chat between event owners and users for enhanced engagement.
- Integrated an AI-powered event recommendation system, increasing event participation by 35

3D Modelling for Construction Industry

- Built 3D scene rendering tools using Vue.js JavaScript, enhancing visualization and accuracy in architectural designs.

Electronic Data Management System

- Designed a secure, scalable data management system using Python, Django, Vue.js, and React.
- Improved data visualization and authentication processes.
- Enhancing system reliability and user engagement.

EDUCATION

Bachelor of Electrical and Electronics Engineering, Mahendra Engineering College 2020
Relevant Coursework: Control System, Power Electronics, DSP, and Electric Machines.

HSC, Bharathi Vidyalaya Higher Secondary School 2016

SSLC, Bharathi Vidyalaya Higher Secondary School 2014

CERTIFICATIONS

Python - GUVI

FullStack Development - EduBridge

Software Engineering Job Simulation - J.P. Morgan and Goldman Sachs

Advanced Software Engineering Job Simulation - Walmart USA

ACHIEVEMENTS

Application Optimization: Reduced client operational overhead by 20% through workflow analysis and custom reports.

ERP System Development: Led the design of ERP solutions in Openbravo, enhancing HR-finance integration by 30

Data Security Compliance: Maintained strict regulatory compliance while conducting data audits in loan processing.

EXTRA-CURRICULAR ACTIVITIES

Poetry Writing: Crafting thought-provoking poetry exploring human emotions experiences.

Continuous Learning: Committed to upskilling in software engineering and emerging technologies.

DECLARATION

I Mohamed Yasheen M N, here by declare that all the details furnished above are true to the best of my knowledge and belief
